List of Figures

2.1	Full Minimax Tree	7
2.2	Example of Alpha-Beta Pruning	8
2.3	Game Tree Search Program Header	9
2.4	Negamax Version of Fail-soft Alpha-Beta Algorithm	10
2.5	Relative Sizes of Game Trees with Different Move Orderings	11
2.6	State Diagram For Node Types	14
2.7	ALL/CUT Node Structure of the Minimal Alpha-Beta Game Tree	15
2.8	Principal Variation Search (PVS)	17
3.1	Example Speedup Graphs	22
3.2	Chess and Checkers Games Trees	33
4.1	*ParaChinook*'s Principal Variation Splitting (PVSplit)	37
4.2	Principal Variation Splitting (PVSplit) Speedups	43
4.3	Principal Variation Splitting (PVSplit) Search Overhead	44
4.4	Principal Variation Splitting (PVSplit) Percent of Time Idle	45
4.5	Principal Variation Splitting (PVSplit) Normalized Utilization Profile	46
5.1	*ParaChinook*'s Principal Variation Frontier Splitting (PVFSplit)	51
5.2	Principal Variation Frontier Splitting (PVFSplit) Speedups	53
5.3	Principal Variation Frontier Splitting (PVFSplit) Search Overhead	54
5.4	Principal Variation Frontier Splitting (PVFSplit) Percent of Time Idle	55
5.5	Principal Variation Frontier Splitting (PVFSplit) Normalized Utilization Profile	56
5.5	PVSplit and PVFSplit with Load Balancing Speedups	60
5.6	Principal Variation Frontier Splitting (PVFSplit-LB) with Load Balancing Normalized Utilization Profile	61
5.7	All Algorithms Speedups	62
5.8	All Algorithms (Close-Up) Speedups	63
5.9	All Algorithms Search Overhead	64
5.10	All Algorithms Percent of Time Idle	65
A.1	Checkers Board Notation	73
